

**“Platelet-rich plasma (PRP) is a preparation of platelets in concentrated blood plasma with regenerative growth factors used to stimulate skin healing, collagen production, other important proteins that support the skin. There are many clinical applications for PRP—it’s used for the treatment of hair loss, acne scars, surgical scars, stretch marks, pigmentation, volume loss, wrinkles, fine lines, and crepey skin texture”**

**15% off all PRP treatments,  
FACE/MICRONEEDLING and SCALP,  
for the month of November!**
